To our knowledge, American Laboratories, Inc. is the only manufacturer in North America of Thyroid Products for use in Human Pharmaceuticals as an Active Pharmaceutical Ingredient. We have manufactured our Thyroid products for over forty years, and we understand the importance they have to our customers and ultimately the consumer patients. Today, as well as in the future, our Thyroid products will continue to be a strategic part of our business.

Through the years, the world-wide demand for our Thyroid products, as well as our human nutritional enzyme products has increased dramatically. Through careful planning and strict adherence to regulations set forth by the FDA, USDA and other government agencies, we have implemented plans to increase our production capacities. In addition, American Laboratories' is working closely with our suppliers to help ensure a consistent supply of quality raw materials. We hope that you understand that the process to manufacture the active ingredient takes several months to complete.

Please be assured that we have placed our Thyroid production as our number one priority so that we can meet the demands of our customers.
